

Updated Instrument Repair Tag Overview

5/06

Veritas will begin using an updated repair tag this month in an effort to improve the tracking of repairs. The new tag will include additional fields and will help determine whether a repair is part of the M&R program or a billable repair as well as detect accounts in collections and/or default. To promote the success of the new tag, we ask that you provide all of the information that is asked for. Updated repair tags will be forwarded to your store as part of a pre-season bundle which will include a supplement of the other forms used in our program.

Designate as VIR instrument or not (affiliate stock or customer-owned)
