

Veritas Instrument Rental Incorporated

Your Inventory Management Solution is Here

Through a special runtime version of FileMaker (provided at no cost by VIR), Affiliates now have a complete set of tools to manage Veritas instrument inventory. Regardless of whether you are on a Mac or PC, already have FileMaker or not, we can forward a file to you that will open into its own application. Imagine being able to view, find, sort, place notes with and even create inventory records through the same interface our own staff uses. Also included are customized reports for physical inventories, self-audits, missing lists and print inventory screen prompts. You can import and export records in a variety of formats (though you may never leave FileMaker again). We're very excited by the many possibilities this software solution will bring in regard to reconciling inventory discrepancies. For your free copy of this runtime software, complete with your inventory files (as VIR sees it), please contact Kevin at Ext 249. If you have a computer at your store, you need this.

•View, find, sort and add notes
